THE DEEPFAKE CHECK CARD

5 tests on deepfake scams, plus a checklist.

This is my own check card on deepfake scams. It is built from public guidance, including advice from government agencies and security researchers. Threats and best practices change often, so check official sources before you rely on anything here. This is general education, not professional security advice. Never share passwords, one time codes, card numbers or account numbers with anyone who contacts you, and never type them into a chatbot. The five tests and the notes pages are my own.

THE 5 TESTS

1. Use a second channel. Hang up and call back on a number you already trust.
2. Ask something only the real person would know, not something that can be found online.
3. Look for glitches around the mouth, hair and edges, but do not rely on them, because fakes keep getting better.
4. Be wary of urgent money requests. Wire transfers, gift cards and crypto are red flags.
5. Agree on a verification rule at work, like a call back before any payment or password change.

MY VERIFY PLAN

Question	My answer
Who could be faked	
The number I will call back	
My private question	
Who must approve payments	

BEFORE I ACT ON A CALL

- I used a second channel
- I asked a private question
- I did not rush
- I told a coworker

Educational only. General security tips from public guidance. Not professional security advice. Check official sources. No results are promised.

Now put it in front of more people.
