

THE \$0 AI ROOM MAKEOVER KIT

Every ChatGPT prompt to redesign a room and shop the look

Works in ChatGPT with image generation (and in Gemini or other image tools that accept photo uploads). Run the prompts in order, in the same chat, so it remembers your room. Treat the result as a concept: check sizes, prices and availability before you buy anything.

STEP 1: THE PHOTO

- Stand in a corner and shoot wide so the whole room is in frame.
- Turn the lights on and open the curtains. Good light gives better results.
- Clear clutter off the floor. Take one photo per room.

THE PROMPTS

PROMPT 1

The redesign

Here's a photo of my [LIVING ROOM / BEDROOM]. Redesign it like a professional interior designer would. Keep the same layout, windows and doors, but show me how it could look much better with different furniture, colors, lighting and decor. Make it warm, modern and realistic. Create the image.

PROMPT 2

Four styles

Show me this same room in 4 styles: [MODERN / SCANDINAVIAN / FARMHOUSE / COASTAL]. Keep the layout identical and label each image with its style name.

PROMPT 3

Tweak one thing

I love version [NUMBER]. Keep everything exactly the same and change only [THE SOFA TO A DARK GREEN COLOR / THE WALLS TO WARM WHITE / THE RUG TO A LARGER NEUTRAL ONE].

PROMPT 4

The shopping list

Make me a shopping list to recreate this room for under \$[500]. For every item give me the name, a realistic price range, and a link or search term for where to buy it. Put cheaper options first and tell me what to buy first for the biggest change.

PROMPT 5**The contractor plan**

Turn this design into a one-page plan I can hand to a painter or contractor: what to paint and what color, what to move, what to install, and the order to do it in. Keep it short and use plain language.

TIPS

- One change at a time keeps the look you like. Big changes in one prompt drift the whole room.
- Always check the prices and links it gives you. Image tools can guess.
- Show the final image to your family before you spend a dollar.
