THE BEFORE YOU DELIVER CHECKLIST

5 checks to run on what Claude Code built, plus a checklist.

Claude Code can read and edit the files in a project, run commands and run tests, but it is not always right, so review what it changes. This is my own checklist for looking over a small site before a client sees it. No one can promise income from client work, and results vary. Always work with the client's permission and a clear agreement.

THE 5 CHECKS

1. Open every page on a phone. Most visitors will use a small screen, so make sure nothing is cut off.
2. Click every link and button. A broken link makes a site look careless.
3. Read every word for spelling and facts. Names, hours and contact details need your own eyes.
4. Try the form with a test message. Make sure it reaches the right inbox.
5. Ask a friend to try it. A fresh pair of eyes finds what you stopped seeing.

PAGE BY PAGE

Page	Phone ok	Links ok	Words ok

TEST MESSAGE

- I sent a test message through the form
- It reached the right inbox
- The reply the visitor sees makes sense
- I deleted the test message afterwards

FRIEND FEEDBACK

Question	What my friend said
What was confusing?	
What was hard to find?	
What would you change?	
What did I fix?	

Educational only. My own checklist. No results promised.

Now put it in front of more people.

- I sell ready-made business lists to reach customers by email. Message me LIST.
