

THE LEAD SPEED TRACKER

5 steps to answer new leads faster.

One business owner reported reaching every new lead within sixty seconds and closing about fifty five percent of them. That is one owner's report, not a promise for your business. This tracker helps you reply faster and see what happens.

THE 5 STEPS

1. Pick the places new leads arrive, like your website form, your phone, and your messages.
2. Turn on phone alerts for each one, so you see a new lead right away.
3. Write a short first message and a few call opening lines, so you are never stuck for words.
4. Call or message within a minute when you can, and be honest when you cannot.
5. Write down how fast you replied and whether the lead bought, so you can see what works.
