

50 SECRET CHATGPT IMAGE CODES

Short codes that turn ChatGPT's image generator into a design department

How to use them: open ChatGPT, upload your photo or logo if the code needs one, then type the code, a space, and what you want. Example: `/productshot my blue water bottle`. The code is just shorthand for the full instruction underneath it; ChatGPT reads the whole line, so you can stack two: `/productshot /goldenhour my candle`. If a result is close but not right, reply 'keep everything, change only the background' and it will edit instead of starting over.

PRODUCTS & E-COMMERCE

01 <code>/productshot</code>	Clean studio product shot on a seamless white background, soft shadow, catalog-ready.
02 <code>/lifestyle</code>	Put the product in a real setting: kitchen counter, desk, gym bag, whatever fits the buyer.
03 <code>/flatlay</code>	Overhead flat-lay arrangement with matching props and even daylight.
04 <code>/packshot360</code>	Same product from front, side, back and top as a 4-up grid.
05 <code>/beforeafter</code>	Split image: left before, right after. Great for cleaning, fitness, renovations.
06 <code>/handheld</code>	A hand holding the product at natural scale so people can judge the size.
07 <code>/bundle</code>	All the items in an offer grouped as one hero shot with a price-tag space.
08 <code>/seasonal</code>	Re-dress the same product shot for Christmas, summer, back-to-school, Black Friday.
09 <code>/colorways</code>	The same product in 6 colors on one sheet.
10 <code>/unboxing</code>	Open-box shot: product half out of branded packaging with tissue and a card.

ADS & SOCIAL

11 /adcreative	Scroll-stopping ad layout with safe space top-left for a headline and bottom for a CTA button.
