THE ROOM MOCKUP CHECKLIST

5 steps to test AI room mockups honestly, plus a checklist.

One creator shows redesigning rooms with Claude Code: install an image skill, add an API key, upload a room photo and describe the style. People who list or rent homes might find an idea picture useful, but no one can promise income. The idea is theirs. The five steps and the checklist pages are my own addition. Always get permission to use a photo, keep your API key private, and present the result as an idea, not a promise of the real room. Results vary.

THE 5 STEPS

1. Get permission to use the room photo. Only use photos the owner agrees to share.
2. Set up the image skill the creator shows. Keep your API key private.
3. Describe the style in plain words. Name the colors and what stays the same.
4. Show it as an idea picture, not a promise of the real room. Say real furniture will differ.
5. Ask what they would change. Their reaction tells you if it is useful.

STYLE WORDS

Question	My answer
Which colors do I want?	
What mood should the room have?	
What must stay the same?	
What should be left out?	

BEFORE I SHOW IT

- I have permission to use the photo
- My API key is not in anything I share
- The picture is labeled as an idea
- I said real furniture and finishes will differ

WEEKLY TRACKER

Week	Rooms tried	Feedback I got
Week 1		
Week 2		
Week 3		
Week 4		

Educational only. One creator's idea plus my own checklist. No results promised.

Now put it in front of more people.
