

BUILD A WEBSITE WITH CLAUDE CODE

Exact commands • copy and paste • no coding needed

1

Get a paid Claude plan

Claude Code needs a paid Claude plan: Pro or Max (Team and Enterprise work too), or a Claude Console account. Sign up or upgrade at claude.ai.

2

Install Claude Code

Open your terminal (Terminal on Mac, PowerShell on Windows). Paste ONE line and press enter:

```
Mac / Linux / WSL: curl -fsSL https://claude.ai/install.sh | bash
Windows PowerShell: irm https://claude.ai/install.ps1 | iex
```

Check it worked by typing: `claude --version`. Anthropic also recommends Git for Windows on Windows. Prefer a package manager? Mac: `brew install --cask claude-code`. Windows: `winget install Anthropic.ClaudeCode`

3

Make a folder and start it

Make a new folder for your site, open your terminal inside it, then type `claude` and press enter. The first time, your browser opens so you can log in with your Claude account.

```
mkdir my-website
cd my-website
claude
```

4

Tell it what to build

Type what you want in plain English. Use the starter prompts on page 2. Claude writes the files for you. If it asks permission to create files or run commands, read the request before you say yes. Want a change? Just say it: make the header navy and add my phone number.

5

Preview it, then put it online

Double-click the `index.html` file Claude made. It opens in your browser. Ask for changes, then refresh the page. When you love it, go to app.netlify.com/drop and drag the whole folder onto the page. Netlify gives you a live link. Sign in to Netlify when it asks so you can keep and update your site.

Commands and menus change as Claude Code updates. Always check the official quickstart: code.claude.com/docs/en/quickstart. Stuck? Type `/help` inside Claude Code.

COPY-PASTE PROMPTS FOR YOUR FIRST WEBSITE

Fill in the [BRACKETS], paste into Claude Code, press enter

PROMPT 1: YOUR FIRST SITE (paste this first)

Build a one page website for [BUSINESS NAME], a [TYPE OF BUSINESS] in [CITY]. Include: a headline that says what we do and where, a big Call Now button that dials [PHONE], our services, a short about section, three customer reviews, and our hours and address. Style: clean and modern with [COLORS]. It must look great on a phone. Put everything in this folder with an index.html file I can open in my browser.

4 MORE PROMPTS TO KEEP GOING

2 Add areas + FAQ

Add a Service Area section listing these towns: [TOWNS]. Add a Frequently Asked Questions section with these questions and answers: [PASTE 5 QUESTIONS AND ANSWERS]. Keep the same style.

3 Make it look pro

Make this look more professional. Bigger headlines, more white space, buttons that stand out, and a Call Now button that stays on screen on phones. Keep all my text. Then tell me what you changed.

4 Show up in local search

Add the basics for local search: a title tag and meta description that mention [SERVICE] and [CITY], clear headings, alt text on every image, and LocalBusiness schema (JSON-LD) with my name, phone, address and hours.

5 Offer it to a business

Write a short, friendly message I can send to the owner of [BUSINESS NAME] offering to build their website. Say I already made a sample homepage for them and ask if they want to see it. Under 80 words, no pressure.

YOUR CHECKLIST + LINKS

Tick them off, then build the next one

- ☐ Paid Claude plan is active
- ☐ Claude Code installed (claude --version works)
- ☐ Project folder made and logged in
- ☐ First site built and previewed in my browser
- ☐ Site published and live on Netlify Drop

LINKS YOU NEED
